

The School of Thinking

website and e-Course

260 words | 2 pages | First Issue, October 2005

The School of Thinking (SOT) was founded in 1979, to teach thinking as a skill by Dr. Michael Hewitt-Gleeson and Edward de Bono. It's a free school and a virtual school on the Internet and via e-mail. The SOT's mission is to enrich the lives of people by helping them to become smarter and more effective thinkers. Their 'lessons' have reached more than 70 million students in over 40 different countries around the world.

SOT accomplishes their mission...

... through a daily series of 10 free emailed lessons designed to help each trainee to become a skilled thinker through daily practice in speed thinking, creative thinking, positive thinking, lateral thinking and new brain software which goes way beyond 'critical thinking'— the 2,500 year-old Aristotelian Logic and Platonic Truth which so dominates Western thinking.

Students learn from the training, which SOT calls an intellectual smorgasbord of brain software— neuroware— new mind techniques, cognitive methods and

thought processes in their own way and on their own terms. Benefits include developing speed of thought and going beyond logic in solving problems.

What kind of new mind techniques and "neuroware" will you be learning?

How to use the universal brain software **CVS TO BVS** to shift from the *Current View of the Situation to a Better View of the Situation* to think outside the box on command. The **SDNT** Search Engine: *Start-Do-Notice-Think*. **QRH** Styleware: *Quality-Recognition-Humor* and the **PRR** Personal Trainer: *Practice-Repetition-Rehearsal* and more.

It's fascinating stuff and the price makes it (almost?) irresistible.
